WORK EXPERIENCE

Front-End Developer

Monster Group

February 2022 – February 2023

- Collaborate with the design team to translate user requirements into a visually appealing and functional web application using React.js.
- Build reusable React components and implement them in the CMS to enable fast and efficient development of new features.
- Optimized the application for fast loading and improved user experience
- Worked with the UX team to develop wireframes and prototypes for new features
- Worked with the QA team to identify and fix bugs in the applications
- Participate in code reviews to ensure high-quality and maintainable code.
- Collaborate with the back-end development team to ensure seamless integration between the front-end and the back-end.
- Continuously improve the application by incorporating user feedback and staying up-to-date with the latest React.js features and best practices.

Front-End Developer

Aplikasi Penunjang Ekonomi Nasional

Agustus 2020 – January 2022

- Develop a user-friendly and responsive front-end interface using React.js.
- Build reusable React components and implement them in the website to enable fast and efficient development of new features.
- Integrate the front-end with back-end APIs to ensure smooth and efficient data flow between the server and the client.
- Implement search engine optimization (SEO) techniques to ensure that the website is easily discoverable by search engines.
- Collaborate with the back-end development team to ensure seamless integration between the front-end and the back-end.
- Work closely with the design team to ensure that the visual design and user experience of the website are consistent with the client's requirements.
- Implement state management using libraries such as Redux to ensure consistent and predictable application behavior.
-

Front-End Developer

Wardaya College

January 2019 – Juli 2020

- Develop a user-friendly and responsive front-end interface.
- Implement secure authentication and authorization mechanisms to ensure that user data is protected.
- Develop and implement a content management system (CMS) using React.js to allow the client to easily manage the content of the website.
- Integrate the front-end with back-end APIs to ensure smooth and efficient data flow between the server and the client.
- Implement search engine optimization (SEO) techniques to ensure that the website is easily discoverable by search engines.
- Collaborate with the back-end development team to ensure seamless integration between the front-end and the back-end.
- Work closely with the design team to ensure that the visual design and user experience of the website are consistent with the client's requirements.
- Participate in code reviews to ensure high-quality and maintainable code.
